

Questions and Answers

1. Academy Learning and Support

1.1 Who founded the MAGA Academy and who runs it?

Answer: The owner of the Channel is President Donald J Trump. There is a support team to answer any queries you may have.

1.2 Is the Academy connected to President Trump?

Answer: Yes.

2. Wallet Setup and Account Access

2.1 What should I do if I forget my LOBSTR password?

Answer: For an email-based account, use the official Forgot Password process: approve the email, wait at least 48 hours, and complete recovery with your Recovery Phrase or applicable older Recovery Code. A login error alone does not prove hacking; contact official support if recovery fails, without sharing your secret Key or recovery Phrase.

2.2 How much does setting up LOBSTR cost?

Answer: The app and account creation are free. A basic Stellar wallet needs a 1 XLM reserve—not a LOBSTR charge—and normally another 0.5 XLM per trustline, signer, or open offer; funding-provider fees and network fees may also apply.

3. Assets, Trustlines, and Verification

3.1 How can I see how many trustlines my LOBSTR wallet has?

Answer: On LOBSTR web, open Home → Reserved and read “Trustlines (assets)” in the balance breakdown. On mobile, open XLM from Home, then “Reserved balance.”

3.2 How many trustlines can I still add?

Answer: Stellar’s limit is 1,000 trustlines, which is shared by trustlines, open offers, additional signers, and data entries (not 1,000 trustlines plus everything else). Subtract your total subentries from 1,000 and check available XLM: each ordinary new trustline normally reserves another 0.5 XLM, plus transaction fees.

3.3 How do I add a trustline using a QR code?

Answer: You add a trustline using a QR code by scanning the QR code for the trustline in LOBSTR. See Topic 2.4.

4. Trading, Transactions, and Balances

4.1 Can I reverse a transaction sent by mistake?
Answer: A completed Stellar payment cannot be edited or reversed by LOBSTR; ask the recipient or receiving service whether they can return it.

4.2 What are the transaction fees?
Answer: Ordinary Stellar transactions have a minimum network fee of 0.00001 XLM per operation, rising with congestion. Swaps, market trades, cross-chain transfers, and deposit/withdrawal services can add fees; check the confirmation screen.

4.3 How can I follow my assets' market value?
Answer: Use Assets in LOBSTR for prices, charts, and balances, and enable mobile price alerts in Settings. Displayed values are estimates, not guaranteed sale proceeds; check liquidity and the actual sale quote.

4.4 Do swaps and trades have different fees?
Answer: Yes: LOBSTR's Stellar swaps and market trades include an asset-dependent fee, currently 0.5–1% for non-scam categories before eligible discounts. Limit orders have no LOBSTR trading fee, but network fees and reserve requirements still apply; always check the current preview.

4.5 Can I cancel a purchase in LOBSTR?
Answer: Not once completed on-chain. You may sell the asset again at the available price, but that is a new transaction and may produce a loss; an unfilled order can be canceled.

4.6 How can I sell XRP for XLM?
Answer: See Topic 2.10. In LOBSTR, there is native XRP on the XRPL and XRP by way of fchain.io on the Stellar network. In order to trade or swap your XRP for XLM, you must use XRP on the Stellar network (fchain.io).
